

Technical Datasheet

LCT Handwaschcreme - Fluid

Sand- and wood-free, very highly concentrated and skin-friendly hand wash cream based on a tallow-coconut fat-alcohol sulphate, with over 90 % biodegradable, washing-active substances and a special skin protection agent.

LCT Hand Wash Cream - Fluid foams well, dissolves quickly in water, does not smear and does not block drains. In addition to the very good cleansing effect, a pleasant creamy effect appears on the skin after washing.

LCT Hand Wash Cream - Fluid has a thick, pumpable consistency so that it can be dispensed via dispensers. It is therefore the solution for significantly more economical use of hand cleansing products!

Texture

Beige-brown, medium-pasty substance with a lemon scent

Composition

Anionic and non-ionic surfactants, skin protection agents, fragrances and preservatives, Polyurethane granules, water, auxiliary washing active substance:

Approx. 17 % pH value:

Approx. 6.5 Density:
