

Technical Datasheet

LCT Sanitär- und Gebäudereiniger

Areas of application:

Sanitary porcelain, ceramic, enamel, acrylic, plastic, glass
Tiles, bathtubs, washbasins, chrome fittings, shower cubicles, WC, urinals

Properties:

- liquid
- Acidic
- quickly and thoroughly removes limescale deposits, soap residues, etc.
- unpleasant odors are masked by the fresh fragrance
- Gentle on materials and skin
- After treatment, a natural shine is achieved with excellent run-off properties
- Resoiling is inhibited, thus extending the cleaning intervals

Application method:

- by spraying, washing and wiping, in steam jet and high-pressure devices
- Dilute 1:50 to 1:10 with water depending on soiling/calcification
- Can also be used pure for stubborn soiling
- Apply to the surface with a sprayer, sponge or cloth and after a short (1 - 3 min.) rinse with cold water

Technical data:

Characteristics: clear, red liquid with a pleasant fruity fragrance

Density (20°C): 1.07 + - 0.015

pH value (conc.): approx. 2.0

pH value (1 %): 2,7 + - 0,3

Shelf life:

6 months at + 5°C to + 30°C, dry and sealed.
