

## Technical Information

# LCT Kokoscleaner Alu

### Description:

Low-foaming. Aqueous cleaner with strong dissolving power for removing heavy soiling such as difficult-to-remove special greases, rubber abrasion, bitumen and wax residues, oils and pastes. The aqueous cleaner, with a pleasant odor, is based on renewable raw materials from recycled products. These natural active ingredients give the cleaner strong dissolving properties. The surface is not attacked and the original appearance is restored. A special aluminium protection formula prevents tarnishing of aluminium, brass and nonferrous metals.

### Fields of application:

The LCT Kokoscleaner ALU is ready to use and suitable for both manual and machine use for ultrasonic and immersion applications. For cleaning heavily soiled components of various materials, effective even at room temperature. If necessary, it can be heated up to 40 °C, which increases the cleaning performance.

### Shelf life:

12 month at +2 °C bis +35 °C, dry and sealed

## **Supplementary documents:**

EU-Safety data sheet

## **Disposal:**

The following waste code numbers are recommendations based on the expected use of the product. Due to the specific use and disposal conditions of the user, other waste code numbers may also be assigned under certain circumstances.

**Waste code according to EWC/AVV for unused product: 20 01 29**

**Waste code according to EWC/AVV for the packaging: 15 01 02**
